Bach Vo

Staff Software Engineer at LinkedIn
Los Angeles Metropolitan Area

Summary

With over eight years of experience in web development, I am a passionate and skilled staff software engineer at LinkedIn, where I help our members find their next opportunities. I have a strong background in user experience (UX), site speed performance, and web technologies, and I enjoy working on challenging and impactful projects that make a difference in people's lives. I value innovation, collaboration, and diversity, and I strive to create a positive and inclusive culture on my team and across the organization.

As a staff software engineer on the UX foundations team, I am responsible for building systems and tools that enable our engineers to be more productive and deliver high-quality products. I use JavaScript, TypeScript, React.js, Next.js, html/css to build a fast and reliable LinkedIn Jobs pages, which are visited by millions of job seekers every day. I also ensure the reliability and availability of our site with Kibana, Elasticsearch, and Azure Data Explorer to troubleshoot any issues that may arise on production.

Previously, I was a product engineer on the Careers team, where I worked with product managers and design partners to build new products that help job seekers find their next opportunities, such as Easy Apply, Referrals, Open Candidates, and Open-to-work.

Experience

LinkedIn

9 years 3 months

Staff Software Engineer

March 2022 - Present (2 years 6 months)

San Francisco Bay Area

I am a tech lead on the Job Seeker team. I help build the foundation for a fast and reliable Job Seeker product and help our engineering team be as productive as possible by leveraging the right tools and the latest tech stack.

Senior Software Engineer

March 2018 - March 2022 (4 years 1 month)

San Francisco Bay Area

I am on the UX foundations team on the Careers organization. My role on this team is to help our engineers be more productive by building systems and tools. I am responsible for the site speed performance of the LinkedIn Jobs pages using the latest web technologies to reach our milestones. Lastly, I am responsible for the reliability of our site and to maintain the availability of linkedin.com/jobs to millions of job seekers.

Software Engineer

April 2016 - March 2018 (2 years)

San Francisco Bay Area

I was a product engineer on the Careers team. My role on the team was to work with product managers and design partners to build new products that would help job seekers find their next opportunities.

Products built:

Easy Apply, Referrals, Open Candidates, Open-to-work

Associate UI Engineer

June 2015 - April 2016 (11 months)

San Francisco Bay Area

I was a product engineer on the Careers team. My responsibility was to learn as much as possible about the stack and to familiarize myself with the product development process at LinkedIn. My role on the team was to work with product managers and design partners to build new products that would help job seekers find their next opportunities.
